Astrill apk mirror

We are supported by readers and can earn a commission when you buy through links on our website. Since 2017, the vast majority of websites of VPN providers have been blocked in China. In addition, Google Play doesn't work either, and the App Store doesn't allow users in China to download all VPN apps. For this reason, many people find themselves in the conundrum that to buy a VPN in China, you first need a VPN. Nevertheless, if you are already in China and need to download or buy a VPN, there are still ways to do this. In this article, we will explain how to do this and provide accessible links from China for some VPNs. All of the VPNs we mention in this article have good performance in China, but if you want to know which VPN is best for you, I recommend reading this article first. Important: We test these links periodically to see if they have been blocked and if they are still accessible from China. However, if you find that a link is not working, please leave us a comment at the end of the article and we will update it as soon as possible. How to download a VPN in China. The majority of websites of vpn providers are blocked in China. Despite this, major providers have created mirror websites (exact copies of the website with a different URL) that are accessible. Here is a list of links to the mirror sites of some of the major VPNs: Keep in mind that these sites are also often blocked by China's Great Firewall. If the link doesn't work, let us know in the comments section and we'll change it as soon as possible. Important: Keep in mind that Gmail is also blocked in China and you need an active email account to register a VPN service. Make sure you can access your email account in China before you buy a VPN. Windows and Mac. Downloading a VPN for Windows or Mac in China is not a problem as long as you can access the website of the VPN provider. Access your VPN's website. Purchase chosen a plan based on your needs. Access your account. Deborder the software for Windows or Mac from its website. Install the software on your computer. Connect your VPN and access freely the Internet in China! Android. Downloading a VPN on Android is not very complicated. Because Google Play doesn't work (unless you have an active VPN), you need to download the .apk file. Go to your chosen VPN provider's website and purchase a plan from your phone, go to the VPN provider's website, download the file .apk. When the download ends, open the file (avoid using Google Play to open the .apk file). Open the app and connect the VPN. Use WhatsApp, Play and any other blocked app in China! iOS. Downloading a VPN on an iOS device in China can be a bit tedious, but if you follow a few simple steps, it's not difficult. Go to your chosen VPN provider's website and purchase a plan. Look up or ask for manual configuration settings for the VPN (preferably LTP2 or IKEv2). Go to Settings General VPN Setting and add the configuration your VPN provider has given you. Activate. Activate VPN. Go recently configured at the App Store. Look and install the VPN app. Disconnect the manually configured VPN and use the app. Use all the apps you want in China! Important: If you can't find the app, even with the VPN connected, it's possible that you'll need to change the country of the App Store, and to do so, you'll need to create a new Apple ID.
